OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 12 issued at 11:00 PM yesterday for the heavy rainfall outlook due to TC UWAN.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Significant to severe impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 4.
- **Moderate to significant impacts** from storm-force winds are possible within any of the areas under Wind Signal No. 3.
- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today (10 November):** Palawan, Visayas, and Zamboanga Peninsula, Northern Mindanao, Dinagat Islands, SOCCSKSARGEN, Davao Occidental, and Davao Oriental.
- **Tomorrow (11 November):** Most of Luzon.
- **Wednesday (12 November):** Batanes and Babuyan Islands

Coastal Flooding

There is a **high risk of life-threatening and damaging storm surge** with peak heights **exceeding 3.0 m** within the next 48 hours over the low-lying or exposed coastal communities of Ilocos Region, Cagayan Valley, Central Luzon, Metro Manila, CALABARZON, most of MIMAROPA, Camarines Norte, Camarines Sur, Catanduanes, Masbate including Burias Island. Aklan, Antique, Guimaras, Negros Occidental, Negros Oriental. **Refer to Storm Surge Warning No. 10 issued at 2:00 AM today for more details.**

Typhoon UWAN (FUNG-WONG)

Issued at 2:00 AM, 10 November 2025

Valid for broadcast until the next bulletin at 5:00 AM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the seaboard of Luzon, and the eastern and central seaboard of Visayas, and the eastern seaboard of Mindanao. For more details, refer to Gale Warning No. 8 issued at 5:00 PM yesterday.

24-Hour Sea Condition Outlook

Up to very rough, high, or very high seas over the following coastal waters:

- **Up to 14.0 m:** The seaboard of Isabela, Aurora, and Camarines Norte; the northern and eastern seaboard of Polillo Islands.
- **Up to 12.0 m:** The northern and eastern seaboard of Camarines Sur and Catanduanes.
- **Up to 10.0 m:** The seaboard of La Union and Pangasinan; the eastern seaboard of mainland Cagayan.
- **Up to 8.0 m:** The seaboard of Ilocos Norte and Ilocos Sur; the remaining seaboard of Cagayan including Babuyan Islands; the eastern seaboard of northern and central mainland Quezon; the remaining seaboard of Polillo Islands.
- **Up to 7.0 m:** The seaboard of Batanes and Zambales; the eastern seaboard of Albay and Sorsogon.
- **Up to 5.5 m:** The seaboard of Marinduque; the western seaboard of Lubang Islands and Bataan; the northern and eastern seaboard of Northern Samar; the northern seaboard of Eastern Samar; the northern and western seaboard of mainland Masbate including Burias and Ticao Islands; the remaining seaboard of Quezon, Camarines Sur, Albay, and Sorsogon.
- **Up to 4.5 m:** The seaboard of Pampanga, Bulacan, Metro Manila, Cavite, Batangas, Oriental Mindoro, Romblon, Calamian Islands, Caluya Islands, Samar, Eastern Samar, Biliran, Leyte, Southern Leyte, Dinagat Island, Surigao del Norte including Siargao and Bucas Grande Islands, and Surigao del Sur; the northern seaboard of Cebu including Bantayan Islands; the eastern seaboard of Davao Oriental; the remaining seaboard of Bataan, Occidental Mindoro, Masbate, and Northern Samar.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seaboard of northern Palawan including Cuyo and Cagayancillo Islands, Antique, Aklan, Capiz, Iloilo, and Guimaras; the northern and western seaboard of Negros Occidental.

- **Up to 3.0 m:** The seaboard of Zamboanga del Norte; the western seaboard of Palawan including Kalayaan Islands; the eastern seaboard of Davao del Sur; the remaining seaboard of Northern Mindanao.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seaboard of Palawan.
- **Up to 2.0 m:** The seaboard of Sarangani; the western seaboard of Sulu and Tawi-Tawi; the remaining seaboard of Davao Region.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 15

Typhoon UWAN (FUNG-WONG)

Issued at 2:00 AM, 10 November 2025

Valid for broadcast until the next bulletin at 5:00 AM today.

TRACK AND INTENSITY OUTLOOK

Do not focus on the center track as it may still shift within the limit of the forecast confidence cone. Heavy rainfall, severe winds, and storm surge may still be experienced far from the landfall point or center track, and even in areas outside the forecast confidence cone. **Always refer to the latest hazard warnings currently in effect (e.g., Wind Signals, Heavy Rainfall Warnings, Storm Surge Warnings) and the information under “Other Hazards affecting Land Areas” of this bulletin for more details.**

- On the forecast track, UWAN will emerge over the coastal waters of La Union this morning. Once over the West Philippine Sea, UWAN will maintain its strength until tomorrow (11 November) before gradually weakening due to marginally favorable environmental conditions.
- UWAN will begin to turn northwestward to northward from today until tomorrow (11 November) while remaining at typhoon category. On Wednesday (12 November), UWAN will turn northeastward towards the Taiwan Strait while weakening. It is forecast to make landfall over western Taiwan on Thursday (13 November), then rapidly weaken over the Taiwan landmass before emerging over the waters near Ryukyu Islands before weakening further into a remnant low.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM today.
